

H E A L T H C A R E

TS9600 Touchscreen technology featuring a flexible, web-based interface for more content and more applications for on-the-go guests.

Simplicity in design makes the TS9600 inviting to operate and chic in appearance. Use as an IP telephone, to request resort services, or gain information regarding in-house, regional or international venues, activities and travel. Combine images and audio to increase room service, spa visits and resort participation via TS9600 presentations. Enhance the guest experience through direct and stimulating room communications...at the touch of a screen.

CTS550 Cetus will be making a bold design statement in the enterprise markets with the new CTS550. Sleek modern design VoIP end-points, featuring twelve feature/line keys with busy lamp fields. Plus, a wide view backlit LCD Type II caller ID screen. SIP compliant and IAX2-ready.

Elite 7-Button

E Series We're excited about our new E Series. Designed and engineered in America, and boasting the highest standards of quality, durability and innovation, E Series telephones are amazingly big on features, yet surprisingly small in size. And since their smaller footprint requires less plastic, we use less energy in the manufacturing process, so our impact on the environment is smaller as well.

Available in IP and Analog cordless and corded models.

IP550/IP100 The stylish IP550 and basic IP100 are the perfect solution for today's business Internet telephony requirements.

SIP compatible exceptional quality speakerphones, Passthrough high speed access port), One-Touch, TouchLite® message retrieval, 10 configurable soft keys*, large LCD screen for Caller ID and programming display*, supports IEEE 802.1 p/g for quality of service/VLAN priority tagging.

*Not available on IP100 model.

Cetis, Inc., manufactures, markets and services a wide range of analog, DECT and VoIP telephones for the hospitality industry.

Headquartered in Colorado Springs, Colorado, USA, we have sales/warehouse facilities in the United States, United Kingdom, China, India and Dubai. Our phones are designed and engineered in Europe and the United States, and can be found in every country of the world.

As a responsible global citizen, we strive to lead the world in quality and green hotel technology. Adhering to the strictest quality standards has earned us our ISO-9001 certification, while our RoHS certification ensures our phones are free of lead and other known environmental pollutants. Finally, we are also WEEE-certified for safe disposal of electrical parts and electronic components.

Having one source for all your telephony needs means more product options, better pricing, and unparalleled service before, during and after the sale. From economy hotels to luxurious five-star resorts, we have a phone that will perfectly match your needs. Guaranteed.
