

SCITEC®

Scitec Green Initiatives:

Programs and Results

RoHS Certified Products:

TeleMatrix's products are built in factories that are RoHS Certified. We take pride in providing quality products that protect the environment. With RoHS approval TeleMatrix meets the most rigid International specifications regarding lead and other harmful materials.

Product Packaging:

TeleMatrix is pursuing unique case packaging, which will eliminate the need for individual gift boxes. Our hope would be, that dealers would see the environmental value to this approach and order by the case.

Recycling of Materials/Telephones:

Our Logging department saves all packing materials we receive from returns, and reuses them when repairs are finished and returned.

Discontinued out-of-date telephones are scrapped, using certified salvage companies that remove any part of the equipment that might be reused by others prior to the proper disposal of what might be left. That includes extracting metals, plastics, and other valuable recyclable materials.

Reduction of Paper Products:

In the past, it was common to place a multi-page user guide with each telephone. Now, TeleMatrix only places one guide per case and a small 2 sided installation sheet with each phone. All User Guides are available and may be viewed on our web site's (www.telematrix.net) 'download' page.

Corporate Commitment:

ScitecGreen™ plays an important part in Scitec's corporate culture. We are a worldwide company and our people understand that their immediate decisions will affect those that follow and that Manufacturer's must lead the way. What we do, effects how products, their packaging and their eventual disposal will be handled. Scitec is always pursuing better, more progressive ways to produce and present our products, its good business and good for the planet.
