

TELEPHONE TIP 8:

What is EEPROM technology and how does it help my hotel?

TeleMatrix introduced its EEPROM powered SteelTrap® feature nearly a decade ago. This is yet another TeleMatrix “First” often copied and even advertised as new. SteelTrap eliminated the need for lithium batteries to ensure memory storage of the guest room speed dial keys. For the last 10 years TeleMatrix telephones have not used any batteries for back up and EEPROM requires no power for back up and holds memory even when used in areas of high ESD. This predates all generic branded telephones in our industry.

A public awareness announcement provided by your friends at TeleMatrix and Scitec.
