

TELEPHONE TIP 10:

What can you tell me about IP telephones?

SIP telephones look, dial and operate like analog telephones but they are unlike any other technology ever deployed in telephony. They are data points that operate in a highly complex network. Fortunately, TeleMatrix has done their research and have deployed telephones, training and tools that make the deployment and maintenance of these sets very easy. VoIP/ SIP future proof your property.

A public awareness announcement provided by your friends at TeleMatrix and Scitec.
